

Pricing

The Surgi-Sign Marking System is sold in boxes of 50 kits at \$145.00 per box. Each kit contains our temporary tattoo, a sterile saline wipe for easy application, and a small gentian violet marking pen in a tear-open pouch. When ordering, please let us know about your tax-exempt status. Quantity discounts are available.

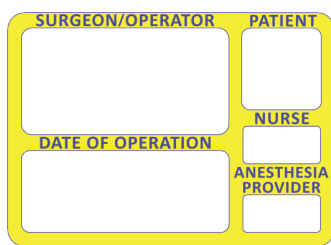

Shipping

We ship UPS Ground, unless you specify a different carrier. Please note that shipping is not included in the price.

Safety

Like you, safety in the operating room is our goal and number one concern. We ensure that safety by using components that are solely manufactured in the USA, and use only materials from the USA. Our tattoos are manufactured using food grade FDA-approved inks and an acrylic co-polymer (similar surgical glues) that meet the demanding ASTM F 963-17 standards. Our tattoos are rigorously tested by an ANAB accredited laboratory for purity, safety, and hypoallergenicity. Additionally, studies have shown our non-sterile tattoos will not alter the effectiveness of surgical site prepping with Betadine® or Chlorhexidene when used as directed.
